

Environmental Studies and Permitting Support

- Aquatic/Wetlands Delineations
- Avian and Bat Assessments
- Biological/Terrestrial Assessments
- Climate Change Meteorological Assessments
- Cultural Resource Assessments
- Due Diligence
- FAA and Radar Interaction
- Federal, State and Local Agency Consultation and Permitting
- Noise Studies
- Project Feasibility Studies
- Public Outreach
- Site Civil Engineering
- Substation and Transmission Line Permitting
- Threatened and Endangered Species Assessments
- Visual Assessments

Offices Nationwide

Serving our clients' environmental needs from 41 offices in the United States and 17 abroad.

For more information on E & E's Environmental Services for the Wind Power Industry, contact:

Western U.S./Canada John Montgomery
(503) 248-5600 or jmontgomery@ene.com

Midwest U.S. Jeffrey Hammond
(716) 684-8060 or jhammond@ene.com

Eastern U.S./Canada Mark Schmitt

Local Wind Facility Permitting Experience in 35 States

With respected experts in over 85 scientific and engineering disciplines, Ecology and Environment, Inc. (E & E), can provide the comprehensive environmental services that your project requires. E & E delivers first-rate environmental consulting and engineering services.

Wind Industry Experience

E & E team has collectively worked on more than 335 wind energy projects in 35 states.

“[The E & E] team did an outstanding job finalizing the addendum and the 1603 application under very tight time requirements, and exhibited amazing grace under pressure.”

Constellation Power, Inc., regarding Cabazon Wind Project, California

With over 1,100 environmental professionals based in 41 offices nationwide and 17 international locations, E & E has been recognized as one of the top 20 all-environmental companies by Engineering News Record, as one of America's best-managed small companies by Forbes, and as one of the best-managed companies on the American Stock Exchange by Fortune.

Environmental Issues

E & E is leading the way in improving the methods to address one of the most difficult issues related to wind energy—avian and bat mortality. Our goal is to reduce study costs while providing more decision-oriented results.

Visual Impact Assessments

Viewshed encroachment can halt wind projects. Our experts understand the nuances of quantifying and qualifying the visual impacts. We create visual simulations and accurate renditions of what the turbines will look like to support public meetings.

Data Management Services

Information Technology (IT) services are an essential component of any project. Our staff includes IT experts in Web design, data analysis, and management.

Strategic Alliances

On behalf of a client, E & E will collaborate and work productively with other project-development team members to achieve common goals.

Strategic Permitting Approaches

E & E provides strategic environmental permitting approaches to prepare scientifically based, environmentally responsible permit applications on schedule and designed to allow the operational flexibility you need. From site selection and planning through construction, startup and long-term compliance, E & E's nationwide team specializes in environmental consulting services.
